Fire Protection for Data Centres

Tyco Fire Protection Products have expertly engineered a complete fire suppression solution for the protection of data centres. Our clean agent systems carry many international approvals providing the user of these systems with the confidence that they have been thoroughly and independently tested to the highest standards available in the industry today.

iFLOW Technology

- Regulated and effective discharge of proven inert gas clean agent.
- Flexibility in design to adapt to architectural needs
- Global approvals

Acoustic Nozzle

- Acoustic Nozzle engineered for noise reduction
- Tested and optimised Sound Performance
- Designed for iFLOW Technology

Acoustic Modelling

- Room Acoustic Modelling based on Acoustic Nozzle sound output, Hard Disk Drive (HDD) distance from Acoustic Nozzle, Use of construction and sound absorption materials
- Understand the Sound Pressure impact on you HDDs
